To David Chuntishvili <d.chuntishvili@a1qa.com>

Hi!

Below you can find all necessary information regarding your test task

Project Name: Kimba

Build version: 2.0

Test environment: Windows 10 x64

Test types that should be provided: Installation/Uninstallation testing (guide for these testing types can be found here:

https://wiki.a1qa.com/pages/viewpage.action?pageId=10879379), Functional testing (including work with specification provided), GUI testing

Test documentation that should be provided: Test Survey for whole application (including installation/uninstallation scenarios)

Also, **Quality Report** with the results of testing should be added into the attachments to the final letter (together with the created **Test Survey**)

Deadline: 20.03.2025 06:00 PM Georgia

Additionally:

 To work correctly with the configurations of the application, the .NET file has to be installed firstly (before installing the app itself)

 Defects should be raised into https://jira.a1qa.com/ (Project: QATC, Component: Kimba, Affects Version: 2.0, Description language: English)

 All questions related to the Test Task can be asked via chat

Please address all your questions to me in slack chat. Please use numbers for all the questions.

Please reply to this letter to confirm that you have received this email.

Please ask for all necessary installation files and requirements for kimba in slack.

Regards,

Daliya
